

# WHY CDRLvue?

## For Defense Contractors

Defense contractors manufacturing weapon systems, aircraft, electronics, or other complex products for government customers must contend with the administration of the contractual data requirements accompanying those items. This typically involves the preparation and submittal of contract data requirements lists (CDRLs), or supplier data requirements lists (SDRLs). For these complex systems, even more so with multiple contracts, the management required for these activities is significant.

CDRLvue is an off-the-shelf web application designed specifically to support the CDRL administration process. For defense contractors, specific capabilities provide support for the preparation and submittal portions of the process. Defense contractor-specific features include:

- ▶ **CDRL Performer Queue:** Status queue that displays all pending CDRL delivery requirements for the logged-in user, sorted by contract and due date
- ▶ **Email Alerts:** Automatic email reminders are sent to those responsible for preparation of CDRL data
- ▶ **CDRL Workflow Reviews:** Customizable workflow processes enable the internal review and sign-off of CDRL deliveries
- ▶ **Pending Items Queue:** Status queue that displays the current status of submitted CDRL data – the queue may be updated either by the customer or contractor
- ▶ **CDRL Metrics:** Customizable delivery metrics monitor key contractual statistics for quality and performance initiatives, such as “% on-time CDRL delivery” and “% CDRL acceptance”

## TopVue Customers Achieve Results

- ▶ Recommended for use on all USAF SMC HQ programs
- ▶ 10% Savings due to decisions based on correct data, reducing rework
- ▶ 10% Overall reduction of IT administration
- ▶ 25% Savings on CDRL data review administration
- ▶ 40% Annual reduction in administration of meetings and other review processes

## Program Manager Benefits Include

- ▶ Online scorecards to monitor quality and delivery performance
- ▶ Enhanced program collaboration via central repository that provides real-time access to program data
- ▶ Increased control of program resources
- ▶ Reduced administration of coordinating resources across contracts
- ▶ Reduced administration of coordinating internal CDRL reviews

## Data Manager Productivity Features Include

- ▶ Ensure timely CDRL deliveries
- ▶ Monitor CDRL requirements across multiple contracts
- ▶ Retrieve lists of CDRL delivery requirements per resource
- ▶ Receive automatic email alerts for pending due dates
- ▶ Route CDRL delivery packages internally for approval
- ▶ Manage CLINs, Mods, and CDRL versions
- ▶ Link CDRL deliveries to contract milestones
- ▶ Generate recurring CDRL delivery schedules
- ▶ Forecast CDRL receipts via calendar
- ▶ Auto-alert reviewers via email
- ▶ Track CDRL delivery metrics
- ▶ Manage actions, meetings, and calendars
- ▶ Full document management
- ▶ Integrated with CM and risk management

“The best CDRL tracking system out there in terms of cost, features, and value.” —*TopVue Customer*

# Mission Critical Solutions

ENABLING. TRANSFORMATION.

TopVue Defense, Inc. provides off-the-shelf, web-based applications that transform how government organizations acquire and sustain systems. TopVue solutions target CDRL & contract management, integrated risk management, joint-program collaboration, configuration management and OSS&E requirements, logistics data management, depot planning, and foreign military sales support. TopVue offers an application-generation architecture that supports the evolution of tailored “integrated business environments.”

## Cost Reduction

- ▶ A significant result of using TopVue technology is cost avoidance. Our off-the-shelf depth in features supports common processes, and our deployed architectural platform is inexpensive to customize and easy to integrate.

## Interoperability

- ▶ TopVue architecture is based on best-in-class web technology, including XML, .NET, Java, and Oracle. This architecture enables plug and play integration and interoperability of data between TopVue and other systems. This maximizes cross-program and cross-agency use, as well as enterprise integration.

## Common Process Support

- ▶ TopVue targets solutions for common processes that can be reused across organizations. Enabling these common processes reduces non-value added redundancies in support of program and center-wide mission objectives.

## Customers

TopVue’s solutions are implemented on major weapon system acquisition and sustainment programs in the Army, Navy, and Air Force. The mission critical domains in which TopVue is used include:

- ▶ Space & C4I
- ▶ Nuclear Missiles and Missile Defense
- ▶ Aging Weapon Systems
- ▶ Anti- Terrorism Installation Protection

## Ready to Implement

The TopVue solution sets are offered off-the-shelf and include the following:

- ▶ RAGEvue: Integrated Business Environments
- ▶ BSCvue: Organizational Balanced Scorecards
- ▶ CDRLvue: Contract and CDRL Management
- ▶ RiskVue: Enterprise Risk Management
- ▶ CMvue: Configuration Management and OSS&E Compliance
- ▶ ILSvue: Integrated Logistics Data Management
- ▶ PMvue: Long Range Sustainment Planning
- ▶ ShieldVue: Installation Protection CM and ILS
- ▶ DepotVue: Depot Planning and Mod. Costing
- ▶ EVMvue: Earned Value Monitoring
- ▶ FMSvue: Foreign Military Sales Contract Management

TopVue solutions can be implemented as a whole, or incrementally assembled to meet your project goals. Call TopVue for details: (801) 825-7100
